Celebrating National Manufacturing Day at Immunocore

Last week a group of S5 students were invited to visit Immunocore, a biotechnology company that discovered, developed and commercialised the world's first approved T cell receptor (TCR) therapy.

Students were given the opportunity to experience and explore the work that Immunocore does through simulated 'real-world' activities, as well as the chance to discuss ideas, inspirations and career pathways with employees. It was an engaging and thought-provoking experience.

Our thanks go to the whole team at Immunocore for a great morning.
